Field of the Invention The present invention relates to a fixing device used in an image forming apparatus, such as a laser printer, a copying machine, a facsimile machine, and a multifunction machine, for fixing an unfixed toner image on a recording sheet. 2. Description of the Related Art In image forming apparatuses, such as a laser printer, a copying machine, a facsimile machine, and a multifunction machine, a belt-like or sheet-like recording sheet is conveyed through a fixing device. In the fixing device, a heat roller is disposed as a heating member, and a surface of the heat roller is heated by a heater. A recording sheet is heated and pressurized by the surface of the heat roller heated by the heater, and toner is fixed to the recording sheet. A technique has been developed in which temperature control for fixing is implemented by a temperature control system that uses a thermistor for detecting a surface temperature of the heat roller, which is disposed inside the heat roller. A thermistor is typically disposed between a core metal, and an electric wire is connected to the core metal, and is disposed in the heat roller. The thermistor is disposed in a non-heating portion of the heat roller. When the thermistor is located in the non-heating portion, the thermistor may be heated, or may be cooled, due to a heat flux that occurs when the heat roller is heated by the heater. Therefore, the thermistor is heated or cooled excessively. Thus, the surface temperature of the heat roller can not be detected accurately.fileFormatVersion: 2 guid

The pack is made in two versions, 64x64 px and 256x256 px. So, you can create icons of both sizes and choose the right one for your project. This pack also contains various icon styles, meaning that you will be able to find icons with rounded corners, cut off, etc. If you want to use only one style, you will have the option of using the smart folder icon, the ribbon style and the standard file icon.
