Web Services API AutoCAD supports XML-based Web Services API, allowing people to access AutoCAD functionality from a web browser. It was deprecated on 1 January 2011, and was replaced by RIA Services. History AutoCAD has evolved throughout its 25-year history, beginning with the programming language, AutoLISP, to the more advanced Visual LISP, on to AutoCAD Forms, to current (since release 2007) Advanced Form Language. AutoCAD first appeared in 1991, as an exclusive add-on to AutoLISP, by Packt Computer Publishing, and with major developer release in 1993. By then, AutoLISP was popular, having been selected as the de facto language for Apple Macintosh. In the early days of AutoCAD, developers used AutoLISP, a custom programming language with object-oriented features and other elements. This language has been described as the language of the CAD world, and was the first development environment to provide AutoCAD capability and for AutoCAD. AutoLISP became the foundation for all the AutoCAD releases since 1993. On September 23, 2006, AutoCAD was the first GIS to deliver "Bicycle Validation". This enabled AutoCAD to deliver map features that are critical to bicycle route mapping and planning, allowing bicyclists to ride safely and confidently. The first major release to include bicycle validation was AutoCAD 2007. On May 18, 2009, AutoCAD released AutoCAD 2009. The same day was the 20th anniversary of AutoCAD 1.0. On January 26, 2010, AutoCAD added the ability to publish publications in conjunction with AutoCAD Architecture. On June 30, 2010, AutoCAD 2010 became available for purchase. On September 19, 2010, AutoCAD 2011 was released. On October 14, 2010, AutoCAD was awarded the .Net Community Hero Award. On March 11, 2011, AutoCAD received an award from the Specialty Equipment Market Association (SEMA) as a 2011 Innovator in Safety. The award recognized AutoCAD's support for the industry's most important safety standard: ISO 22301. On July 19, 2011, AutoCAD Architect was announced. On November 7, 2011, AutoCAD was awarded the ISO 17100:2010 Geographic Information System (GIS) certification. ald647c40b

Go to "App Data"\Autodesk\Autocad\settings.xml Set the value for the secret key to be as follows: my_secret_key Save the settings.xml file Go to "App Data"\Autodesk\Autocad\etc\settings.xml Add the following line to the file: /home/[username]/my_secret_key Save the settings.xml file Close Autocad. Now you can use the AutoCAD on Linux/Mac without having to generate a secret key. Cheers Q: Syntax error on SELECT query in PDO While updating my project from a deprecated database driver (md2), I seem to have broken PDO. When I try to run a query with this command: \$pdo = new PDO('mysql:host=db.mysql.com;dbname=database;charset=utf8', 'user', 'password'); I get the following error: SQLSTATE[42000]: Syntax error or access violation: 1064 You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near 'SELECT * FROM table' at line 1 This error only happens on localhost, so it must be something to do with PDO not connecting to the db on localhost. I can't work out how to trace this. Running the query directly on the db results in the desired output, so I don't think it's the query. A: Your SQL statement is not legal in MySQL, try to replace SELECT * FROM table by SELECT * FROM `table` and add backticks ` to your whole query to denote a table.
