This solution can be used with any USB port, so you can plug your various devices to it from any location. As with the Logitech, the Hub has the same form factor as the USB 3.0, which allows it to be used in any place and connected to the USB port of your notebook. Like the Logitech, the product also comes with an app that allows you to manage your devices and set up your software. Furthermore, it features a fast USB 3.0 port, so you can transfer files and data at a high speed. Although it can be used with most modern devices (i.e. Windows 7, 8 or 10), the package does not include any support regarding different brand of devices. This solution is therefore perfect for those who need a powerful and reliable 2-in-1 solution.
